

Some ISCHEMIA facts about our Portugal sites

Dr. Pinto and the staff at **CHLN - Hospital Santa Maria** were first to be activated in Portugal. The site has enrolled and randomized the first ISCHEMIA participant in the country!!

Dr. Ramos and staff at the **Hospital de Santa Marta** have the highest randomization rate amongst the sites in Portugal—close to randomizing one participant per month!

Dr. Abreu and the team at the **Hospital Fernando Fonseca** have been recently activated for the main ISCHEMIA trial and are ready to enroll their first participant for ISCHEMIA!

Please welcome our newest Portuguese site, Centro Hospitalar de Vila Nova de Gaia!

Dr. Nuno Ferreira will be leading ISCHEMIA's 4th activated site in Portugal.

We thank the team from **Centro Hospitalar de Vila Nova de Gaia** for their help in getting their site ready for enrollment!

We also look forward to welcoming **Dr. Catarina Sousa** and the team from **Centro Hospitalar Barreiro Montijo!**

They are in the process of activation and will be ISCHEMIA's 5th site in Portugal.

Trial-Wide:

*As of November 19th, 2015

Enrolled: 4058

Randomized: 2404

Reminders!

Please send the completed technical worksheet via BioClinica when enrolling a participant via Stress Echo, CMR or NUC. This can be attached at the time of upload via WebSend, or at a later date via the WebView portal (www.websend.bioclinica.com). The same process applies to the technical worksheet for CCTAs.

Please send the complete technical worksheet and the exercise ECGs from the qualifying stress test to the CCC via SafeSend when enrolling a participant via ETT.

CCTAs are required to be uploaded to Bioclinica; if you experience any issues during the upload please contact Bioclinica helpdesk for assistance HelpDeskMailbox@BioClinica.com

Participants randomised to the INV strategy must have the diagnostic films, PCI films (if applicable), post procedure ECG, and a copy of the anonymized PCI or CABG report uploaded via BioClinica. Other required data, such as cardiac markers, must be entered directly into InForm.

IMPORTANT OMT UPDATE!

OMT reports will be sent monthly. Please review the report to ensure your participants are meeting OMT goals. We strongly recommend contacting patients or their GPs to adjust medications as needed between visits.

Non-protocol assigned diagnostic and/or PCI films should only be transmitted upon the request of the CCC, Angio Core Lab or the Clinical Events Committee (CEC). The CEC may also request other documents including discharge summary, ECG, and/or cardiac enzymes.
