

Thank You...!

...to all who attended the ISCHEMIA Investigator Meetings at the European Society of Cardiology Annual Congress. We appreciate your dedication to the ISCHEMIA trial, and the ISCHEMIA-CKD and CIAO-ISCHEMIA ancillary trials. We hope you enjoyed the conferences in London and look forward to seeing you again soon!

CONGRATULATIONS!

- ★ Dr Alex Sirker and team at Barts Health NHS Trust, for randomising their 1st participant in September! ★
- ★ Dr Ramesh de Silva & team at Bedford Hospitals NHS Trust, for enrolling their 1st & 2nd participants ★
- ★ Dr Patrick Donnelly & team for randomising their 10th, 11th, 12th & 13th participants in September! ★

When Do We...?

Some data items are easily missed! Below is a list of commonly missed data items and when they should be collected.

Blood Pressure– Every Visit

Heart Rate–Every Visit

Weight–Every Visit

Medications– Assess at every visit

Hospitalizations– Assess at every visit

Standard Lab Results– Every visit except for 1.5M and CCTA visits

Creatinine– Every 12 months after RAND visit (CKD ONLY)

You may also contact the participants' GP or check other sources that may have the information.

For a full breakdown of required study related activities, be sure to check the *Schedule of Assessments* (available on page 42 in version 2.0 of the protocol)!

What Does This Mean?!

ISCHEMIA Edition

Standard Labs– Include lipid panel (preferably fasting), HbA1c (diabetic patients only), Liver transaminases (if indicated), full blood count, and chemistry panel.

QOL Forms:

Full Baseline Questionnaire — 7 Pages (Rand Visit)

Brief Symptoms Questionnaire — 2 Pages (1.5M Visit)

Full Follow-Up Questionnaire— 5 Pages (12M, 24M, 36M, etc.)

Brief Follow-Up Questionnaire—2 Pages (6M,18M, 30M, etc.)

Complete Ischemic Revascularization:

PCI– revascularization of all vessels ≥ 2.25 mm resulting in ischemia via noninvasive imaging or FFR.

CABG– grafting of all areas of significant ischemia based on pre-operative testing or FFR of intermediate lesions at diagnostic catheterization and revascularization. of areas subtended by occluded coronaries unless the myocardium is demonstrated to be nonviable.

Trial Update As of 9th October 2015
