Protocol Clarification Memorandum #1

February 4, 2014

for

ISCHEMIA Trial Protocol version 2.0, dated January 6, 2014

Summary of Clarification: The purpose of this memo is to provide an administrative correction to a reference in the protocol Appendix A. This change will not have any effect on participant safety, the risk-to benefit ratio of study participation, or the study informed consent forms.

In Appendix A of the Protocol, the footnote 2 reference “See Section 5.5” is incorrect.

Table: Criteria for at least Moderate Ischemia by Stress Test Modality²

²*Additional criteria may be required for confirmation of obstructive coronary artery disease, depending on eGFR and type of ischemia test. See **Section 5.5**.*

This Clarification Memorandum corrects the footnote reference to the MOO (Manual of Operations), as follows:

²*Additional criteria may be required for confirmation of obstructive coronary artery disease, depending on eGFR and type of ischemia test. See **MOO**.*
